Strict = $S_2 \wedge D \wedge T \wedge E \wedge X \wedge (S_1 \vee Rq)$
patterns: 0111111, 1101111, 1111111

S_2: second base short by one

D: repair disables pivot

T: repair precedes second chance

E: messages share endpoint edge

X: grammar can split E and R

S_1 and Rq are individually optional, but at least one is required.
